## 1.1 Graphics Dialog Figures ! Graph... sec:Graphics-Dialog

To insert an image into your document, place the cursor at the text position you want and click on the toolbar icon  or use the menu Insert ► Graphics. Then a dialog will appear to choose the file to load. The image will appear in the output exactly at the position where it is in the text.

The graphics dialog can be called at any time by clicking on an image. This dialog has three tabs:

dialog-show-new-inset\_graphics.png

LaTeX Source

```
% Preview source code for paragraph 6

To insert an image into your document, place the cursor at the text
position you want and click on the toolbar icon \includegraphics{../images/dialog-show-new-ins
or use the menu \textsf{Insert\lyxarrow{}}Graphics. Then a dialog
will appear to choose the file to load. The image will appear in the
output exactly at the position where it is in the text.
